

Your next employee: thorough and experienced problem solver to the position as Product Manager

Hi, my name is Joel Gjerde, I am a person who really is passionate about my work, and I take it very seriously.

I am an active person who plays hockey and floorball in my spare time. In addition to sports, I have 2 children and a wife who I live with in Norrahammar for 1.5 years.

Im currently working as Supervisor for TIP Nordic in the Roadside Nordic department.

I would describe myself as thorough, structured, independent and love to solve problems, both short and long term. Based on what you wrote in the job description, I therefore believe that I am the right person for you!

In addition to my current job, I have previously been involved in starting JG Software AB which is a software company that specializes in solutions for the transport industry. The company also worked with IT consultation for our customers, with everything from network installations to troubleshooting, system integrations, and building completely new ERP systems with customer specifications.

I am used to working under deadlines and hard pressure and am flexible with working hours so that it benefits my colleagues.
